Description of DT Swiss 350 Straightpull Rear Hub - QR 10x130mm - 28 Hole - black

The DT Swiss 350 straightpull hubs combine affordable performance within straight pull hub shells and long-term reliability. Perfect for riders who like to use high quality bike parts and need a tough and durable wheel. The aluminium hubs are 100% swiss made for world class precision and quality. The spoke holes are crafted precisely to make sure the spoke heads can not move under load changes, reducing the risk of spoke fatigue failure. The high quality hubs are equipped with the DT Swiss ratchet system. The patented freehub system which utilizes precise star ratchets, guarantees for a very high load capacity and reliability. Thanks to the ”no tool” concept maintenance is fairly easy. Labyrinth seals protect the bearings from dirt and water and ensure smooth rolling characteristics.

This product has additional options:

Rear Axel / freehub: 5/130 mm QR Shimano 11s - 12s Road , 5/130 mm QR Campagnolo
Number of holes: 28 holes
