Ratchet System This patented freewheel system uses precision ratchets, featuring extremely high load capacity and reliability. The no tool concept allows for an easy execution of routine maintenance. The aluminum hubs are 100% swiss made for world class precision and quality. The spoke holes are crafted precisely to make sure the spoke heads can not move under load changes, reducing the risk of spoke fatigue failure. Labyrinth seals protect the bearings from dirt and water and ensure smooth rolling characteristics.

- Brake rotor mounting system licensed by Shimano.
- No special tools needed for routine maintenance.
