Fitwheels makes wheels.. As many are riders, so many needs for selection and personalize of the appropriate set of wheels. We use for production the highest quality components. When you go against the client's needs, you can make it easy to adjust the wheel specifications to the customer's needs. All wheels built by fitwheels pass through a demanding process that ensures a high end of the product. Dt Swiss - Swiss manufacturer of hubs, rims and other components necessary for the construction of wheels at the highest level. The brand of this brand is known for its high quality performance and unique design. Sapim - A Belgian company specialising in the production of spokes and nipples for the production of wheels.

The presented wheel set is made of DT Swiss and Sapim components. A set designed for demanding users who value failure-free, low weight and individual design. The wheel set is compatible with the tubeless ready system. DT Swiss tubuless ready tape is included.

If you like to make some changes in this spec use our contact form. We're able to prepare your custom wheelset.

The wheelset is equipped with DT Swiss 370 hubs. This is a synonym of durability and failure-free operation. The front hub has two machine bearings. The rear hub is equipped with four machine bearings and 3 pawls system which guarantees excellent freewheel operations. Servicing the rear hub is very simple. Service of rear hub does not require any tools.

The legendary Crest is even better. Wider and even lower profile, the new Crest MK3 sheds weight for faster acceleration and climbing. WideRight 23mm internal width increases tire volume for improved stability with wider tires. Inspired by our carbon technology, the entirely new rim shape adds strength and virtually eliminates the chance of a tire pinch flat. Refined over the past 15 years, our Bead Socket Technology offers the most trusted tubeless seal in the business, making the Crest MK3 the best choice for lightweight, tubeless XC performance

The connecting elements between hubs and rims are spokes and nipples.

We used the DT Swiss Competition spokes in the Race version. Spokes are butted 2.0-1.6-2.0.

Sapim's anodized Polyax nipples are treated with a special coating to increase durability and allow for easier wheel building. Aluminium saves weight,compared to other materials like brass. Sapim's patented Secure Lock technology is a locking mechanism that prevents nipples from untightening. The advantages of this easy locking system are the possibility to use them on a truing machine and that there is no loose function while truing the wheel. Highly precise and accurate machines have specifically been developed to produce this type of locking system. They ensure stable and well defined deformation on the thread and increase the nipple's torsion about 18 cNm (+/- 3 cNm).

This product has additional options:

Front axle: 12/100 mm TA (+ 15.00 Euro), 15/100 mm TA , 5/100 mm QR (+ 19.00 Euro), 15/110 mm TA / Boost (+ 9.00 Euro)
Rear Axel / freehub: 5/141 Boost qr Microspline (+ 61.00 Euro), 12/148 mm TA / Boost / Shimano Microspline (+ 45.00 Euro), 12/148 mm TA / Boost / Shimano MTB (+ 9.00 Euro), 12/148 mm TA / Boost / Sram XD MTB (+ 19.00 Euro), 5/141 mm QR / Boost / Shimano MTB (+ 26.00 Euro), 5/141 mm QR / Boost / Sram XD MTB (+ 43.00 Euro)
2x Valve DT Swiss tubeless 32mm : No , Yes (+ 12.00 Euro)
Front hub: DT Swiss 370 straightpull disc brake
Rear hub: DT Swiss 370 straightpull disc brake
Brake type: disc
Brake rotor mounting system: IS - 6 bolt
Rims: NoTubes Crest Mk3
Wheel size: 27,5" (650b)
Rim material: Aluminium
Quantity of spokes front/rear: 28 / 28
Tires type: Clincher
Compatible with Tubeless systems: Yes
Rim inner width: 23mm
Colour of spokes: black
Spokes: Dt Swiss competition race Straight pull 2.0/1.6/2.0
Nipples: DT Swiss Pro Lock Aluminium
Riding Styles / Intended use: Cross Country
Recommended system weight max.: 86kg
Warranty: 2 years
